

APPENDIX A-2
SOCIAL MEDIA SUMMARY

APPENDIX A-2

SOCIAL MEDIA SUMMARY

Based on the social media summary report of the Phase 1 engagement of the UVIC Cycling plan, it can be viewed that the social media campaigns were successful in serving information about the campaign to the existing and extended audiences of the University of Victoria and UVIC Campus Planning and Sustainability. It can be assumed that because Campus Planning content is generally of a more focused, narrow scope, greater engagement and click through percentages occurred on content featured on their social media channels, however the audience size is still only a fraction of that of the University. Future engagement should keep this in mind, potentially leveraging the habits of the respective audiences to share more or less detailed information based on what the audience will consume. An overview of the social media interactions that occurring during Phase 1 of the Campus Cycling Plan are summarized below.

FACEBOOK POST RESULTS:

- University of Victoria account had 7 posts between Oct 2 – Nov 7; for their 37,177 followers, organic (unpaid) reach was 18,Nov 24; for their

resulting in 4929 impressions, 184 unique
total clicks. For the three boosted (paid) posts,
