

: FORB 2 – Research Assistant

: Centre for Forest Biology

: Dr. Jürgen Ehltng

:

The position offered will encompass work related to basic molecular biology laboratory maintenance including cleaning and sterilization of labware, preparation of common solutions, preparation of bacterial and plant growth media, and cleaning and sterilization of laboratory glassware. The successful candidate will work with graduate students and may also perform molecular biology experiments or other plant biology experiments under their guidance.

:

The successful candidate should be enthusiastic about working in a biology research laboratory team. Basic understanding of molecular tools and techniques employed would be an asset.
