	" î ö ö U ö Ç • š u š ^ μ procure and implement storage modules, network security, remote access/terminal services, security monitoring, and other software/tools to analyze research data.	Establish the initial secure data platform. This platform would be enriched and enhanced each year over the life of the RSF.	# of researchers and their team members who have adopted the platform, # of GBs of sensitive data stored on the platform, # of researchers trained, # of research centers supported	Multi-year outcomes resulting from our research involving sensitive information are important to Canada's prosperity, health & environment. It is critical that UVic safeguard our research and research data.	360 researchers adopted the secure data platform (Velum), 429 TiB of research data stored on the platform, 100 researchers trained, 3 research centers have adopted the secure data platform.
