energy on the President's Council of Economic Advisors (1974-1976); and (3) was staff economist at what is now the Federal Energy Regulatory Commission (1966-1967). He is the author or coauthor of more than one hundred reports, articles, and chapters in books and has lectured extensively on energy and environment policy in this country and abroad. He has also served on a number of government and private sector energy and environmental advisory committees and consultancies. In 1995, he was elected a fellow of the Society for Risk Analysis.

Nichole Kerchner, a research assistant for the project reported in this article from 1998-2000, currently is enrolled in the University of Tennessee Rehabilitation Counseling graduate program. She also is a job coach at the Oak Ridge High School.
