~Thanks to Dr. Julia Baum for sharing course material included herein.

- **Course Rationale and Format**

The overarching goals of this course are

Take-home final project: You will be given the task of producing a monitoring protocol for Mystic Vale which will be practical and require application of the knowledge you gained in the course. The format, style, and selection of key components will be up to you to decide upon and design.

Participation: Participation will be evaluated based upon how well you communicate your insights
