## COURSE DESCRIPTION

practice in using standard software for the analysis of climatic data and in making observations to build and support ideas about how things work. Preparing synthesis reports is a major skill needed in the job market. Analysis and presentation of data is a necessary skill in all fields. Labs are not designed to march in step with lecture material they are their own course component.

Please attend only the laboratory section for which you are registered. If you must miss a lab for exceptional circumstances, please arrange with your TA in advance to join another section. This however does not change the due date of your lab assignment.

Details regarding your labs and their marks are managed by the course TAs. Please discuss any issues or questions on labs with your TA first and then direct questions at the instructor if you would like further clarification. Any excuses for late labs (i.e. sick, etc.) must be approved by the course instructor (Ben).

While we do our best to guide you through this unprecedented learning experience, TAs and I will not be answering emails 24/7. Make sure that you address all questions regarding assignments or material in time to receive a response within the work week.

---

### GRADING SYSTEM

As per the Academic Calendar:

| Grade | Grade point value | Grade scale | Description |
|-------|-------------------|-------------|-------------|
|-------|-------------------|-------------|-------------|

POLICY ON ATTENDANCE

---

---

---

---

---

detailed information nearer the time but please be thinking about this important activity during the course.

---

#### DISCLAIMER

The above schedule, policies, procedures, and assignments in this course are subject to change in the event of extenuating circumstances.
