individually (not as groups).

None. For project and seminar-based work you will be expected to make additional use of remote sensing texts, journal articles, other material in the university libraries, & web-based information to support your work. Readings will also be provided by your instructor.

It is always useful to have a desk-reference on remote sensing handy, and several broad and specific remote sensing texts are available through the library, for example: https://search.library.uvic.ca/permalink/01VIC_INST/1ohem39/cdi_askewsholts_vlebooks_9781119956402

Lectures materials, assigned readings, and general course communications will be via Brightspace. You are required to come prepared for each lecture. This means you should have read and considered the assigned readings.

Lab Instructor Kali McDougall: kalimcdougall@uvic.ca

There are 2 lab assignments, one early in the course, and one later on. The rest of the lab time will be dedicated to work on the group term-length projects. Attendance is required. All labs will be held in the Geomatics Lab A253.

Late lab assignments are subject to significant penalties: 20% per day following the due date and time. Exceptions are not permitted except for circumstances involving medical or compassionate reasons. Written verification as proof may be requested at the discretion of the instructor.
