

Aquaculture in British Columbia

Dr. Mark Flaherty

Office Hours: Turpin B352 Monday 1:30-3:30

Lectures will be Face-to-Face Some guest lectures will be via ZOOM

We acknowledge and respect the Indigenous peoples on whose traditional lands and the Songhees, Esquimalt and SÁNEĆ peoples whose lands the land continue to this day.

COURSE DESCRIPTION

British Columbia's coastline stretches for 25,725 km. Aquaculture is a key part of the BC economy and that of many coastal communities. BC is Canada's largest producer of seafood, providing over half of Canada's output. This course examines the future development of BC's aquaculture industry. Students will be introduced to the history, the species culture, production methods, technological innovations, issues, First Nations involvement, and the regulatory framework for the industry. The lectures will be structured to encourage discussion and evaluation of the risks of this approach to seafood production in response to demand.

GEOGRAPHY

LEARNING OUTCOMES

FIELD TRIP

Arrangements are being made ~~for~~ for an overnight field excursion on Vancouver Island. Participation is encouraged but not required. The Department of Geography will contribute towards the cost, but students will have to make up the difference. The cost will be indicated prior to signup sheets being made available.
